

**Mandatory Public Notification Language
Notice of Drinking Water FLUORIDE Violation**

October 2019

The Texas Commission On Environmental Quality (TCEQ) has notified the Borden County Water System that the drinking water being supplied to customers had exceeded the Maximum Contaminant Level (MCL) for FLUORIDE. The U.S. Environmental Protection Agency (U.S. EPA) has established the MCL FLUORIDE at 4.0 mg/L, and has determined that it is a health concern at levels above the MCL. Analysis of drinking water in your community for FLUORIDE indicates a compliance value in quarter three, 2019 of 5.6 mg/L for EP001.

This is not an emergency. However, some people who drink water containing FLUORIDE in excess of the MCL over many years could get bone disease, including pain and tenderness of the bones. Fluoride in drinking water at half the MCL or more may cause mottling of children's teeth, usually in children less than nine years old. Mottling, also known as dental fluorosis, may include brown staining and/or pitting of the teeth, and occurs only in developing teeth before they erupt from the gums.

An alternate source of water should be provided to the affected population, which consists of children less than nine years old. The alternate water should be used for drinking and cooking only. However, if you have health concerns, you may want to talk to your doctor to get more information about how this may affect you.

We are taking the following actions to address this issue: water vouchers are available to families with children 14 years of age or younger, also we are working to correct the problem by investigating alternative solutions.

For further information contact the County Judge's Office, Borden County Courthouse, 117 E. Wasson, Gail, Texas 79738, phone 806/756-4391
